MODULO 3 | Desarrollo de Aplicaciones Móviles Android Java | Ignacio Cavallo

https://github.com/cavigna/modulo_desarrollo_de_aplicaciones_moviles_android_java

Clase 48 | 07-07

La aplicación del día fue:

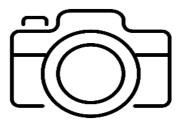

Una app que saque fotos y la muestre!

Como siempre el código al final de este readme!.

Resultado

Home

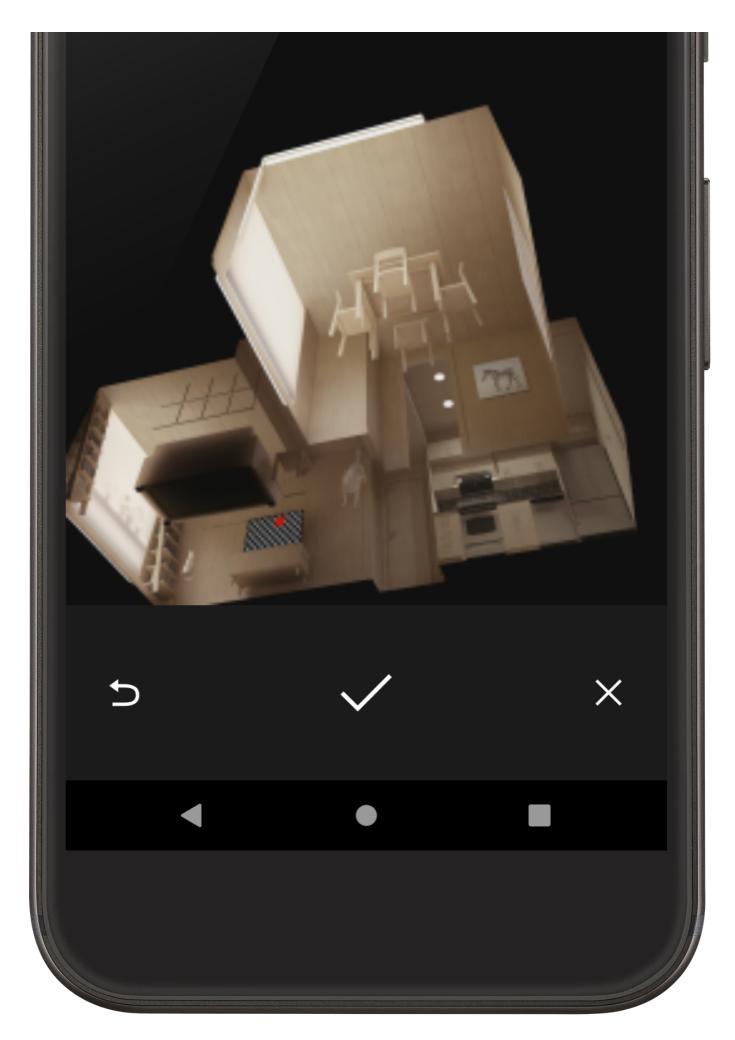

Sacar la Foto!

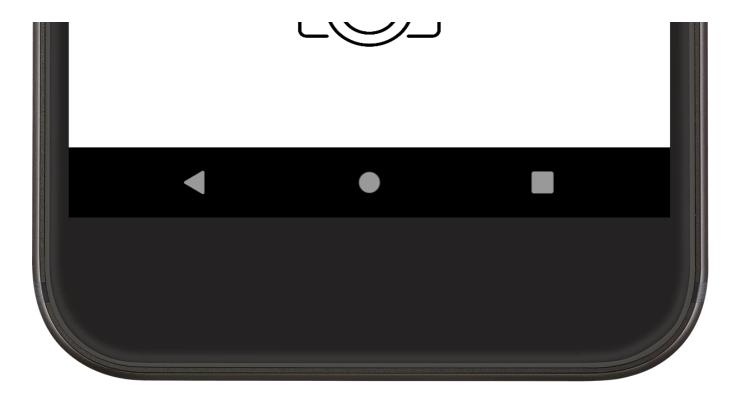

Código

Main

```
public class MainActivity extends AppCompatActivity {
   ImageButton btnCamera;
   ImageView imageView;
   static int REQUEST_IMAGE_CAPTURE = 1;
  @Override
  protected void onCreate(Bundle savedInstanceState) {
       super.onCreate(savedInstanceState);
       setContentView(R.layout.activity_main);
       btnCamera = findViewById(R.id.btnCamara);
       imageView = findViewById(R.id.imageView);
       btnCamera.setOnClickListener(new View.OnClickListener() {
          @Override
           public void onClick(View v) {
               abrirCam();
          }
       });
  }
  private void abrirCam(){
       Intent intent = new Intent(MediaStore.ACTION_IMAGE_CAPTURE);
           startActivityForResult(intent, REQUEST_IMAGE_CAPTURE);
```

```
@Override
protected void onActivityResult(int requestCode, int resultCode, Intent data) {
    super.onActivityResult(requestCode, resultCode, data);
    if (requestCode == REQUEST_IMAGE_CAPTURE && resultCode == RESULT_OK) {
        Bundle extras = data.getExtras();
        Bitmap imageBitmap = (Bitmap) extras.get("data");
        imageView.setImageBitmap(imageBitmap);
    }
}
```
